

**CLARIFICATIONS FOR PROCUREMENT OF CONSULTANCY SERVICES TO
DEVELOP ENERGY EFFICIENCY STANDARDS AND LABELLING LEGISLATIVE INSTRUMENTS**

RFP: 5610500/RFP/QCBS/11/18

SI	Ref	Question	Answer
1		<p>4.2.3. "Drafting of amendment LIs for review and adoption by EC and AG's Technical Committee as may be necessary." and</p> <p>4.3.3. " Work with the EC, NCA and GSA representatives to establish the Ghana standards for television sets and decoders for adoption." in the scope of services.</p> <p>Query: Annex II (Table 2) of the RFP provides list of products without LIs under the S&L program. Our query is:</p> <ul style="list-style-type: none"> - Before developing the LIs does the ToR require bidder to also develop energy efficiency metrics, benchmarks and rating tables for these respective products? OR - Whether the draft energy efficiency metrics are already available and only the LIs needs to be developed? In case the energy efficiency metrics for some of the products under table 2 of Annex II is already available then for which of the products it is not available? 	<p>The real work is the development of the schedules containing the energy efficiency rating tables and the computations so, yes bidders need to develop energy efficiency metrics, benchmarks and rating tables and make the Legislative Instruments readily usable.</p>
